- 5 This is / These are the yogurt I was telling you about.

READING**A Read the text and choose the correct answers (a, b, or c).****A Balanced Diet**

It is important to have a balanced diet. This means eating a mixture of protein, carbohydrates, fruits and vegetables, and dairy and fats.

But that is not all. The real question is, "How much?"

It is important to look at how much you eat. For healthy people with a balanced diet, 30% of what they eat is fruits and vegetables. Twenty-five percent of what they eat is carbohydrates like bread and pasta. Twenty percent of their diet is milk and dairy, and the same for protein. Only 5% is fats and sugar—so watch out for that soda!

If you eat a balanced diet with food from all the food groups, you can lead a healthy lifestyle.

- 1 A balanced diet is ...
 - a eating the right amount of each food group.
 - b eating a mixture of food groups.
 - c not eating dairy and fats.
- 2 Eat most of this food group for a balanced diet.
 - a carbohydrates
 - b proteins
 - c fruits and vegetables
- 3 To have a balanced diet, ...
 - a 20% of your diet is protein.
 - b 25% of your diet is fruits and vegetables.
 - c 5% of your diet is dairy.
- 4 Eat least of this food group for a balanced diet.
 - a fats and sugar
 - b protein
 - c milk and dairy
- 5 Be careful of soda because ...
 - a it is full of fat.
 - b it is in the fats and sugar food group.
 - c it is very healthy.

WRITING

A Do you have a healthy or unhealthy diet? Write about the food you eat. Write at least 100 words.
